

PRODUCT SUMMARY

Wildfire Protection Full Kit

Gutter Mount Sprinkler System

The Wildfire Protection Full Kit helps protect your home. Hot burning embers blown by the wind often land on rooftops, igniting homes miles away from the wildfire. If your roof is wet, it shouldn't burn.

Fits every home

The 360-degree continuous spray of the gutter mount sprinklers wets the roof and surrounding areas to help defend the home against the wildfire threat and burning embers.

The Wasp Wildfire Protection Kits provide a simple and effective way to get water to the rooftops of houses during wildfire emergencies.

Easy to deploy; a child or senior can easily attach the sprinkler to the gutter of a home in seconds with any household painting pole or even a broom handle.

PRODUCT SUMMARY

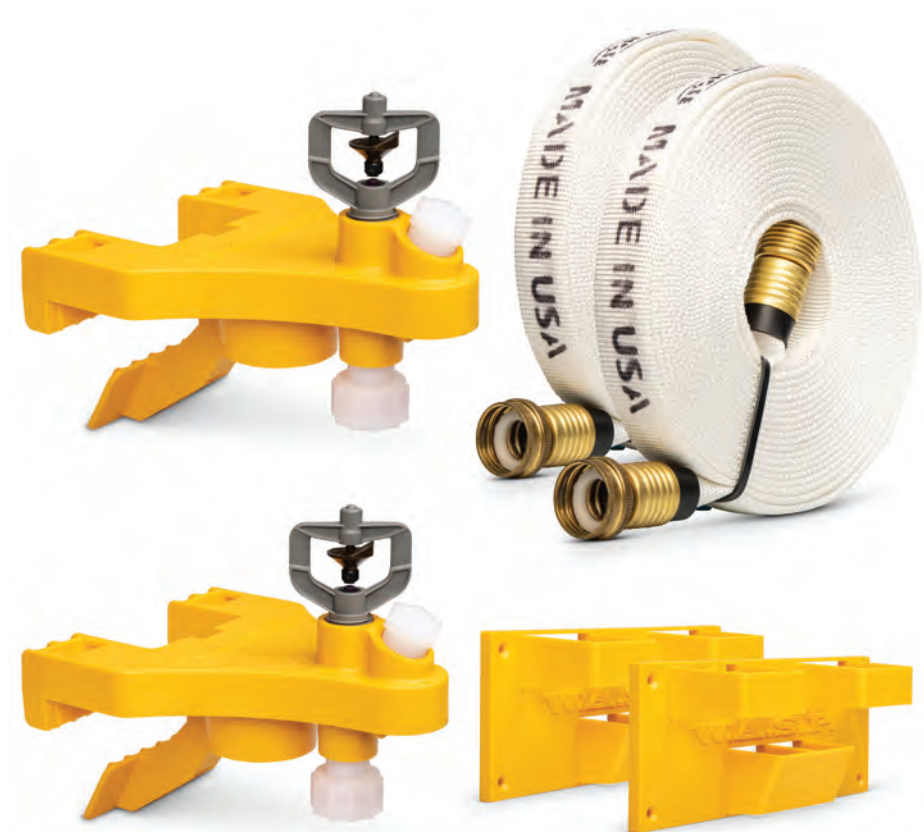

THE WILDFIRE PROTECTION FULL KIT INCLUDES:

2 PATENTED HIGH QUALITY WASP GUTTER MOUNT UNITS

2 AGRICULTURAL GRADE WIND FIGHTING SPRINKLER HEADS

2 25' LAY FLAT FORESTRY HOSES

2 FACIA/FENCE BRACKETS

Requirements

Installation: Easy to deploy; a child or senior can easily attach the sprinkler to the gutter of a home in seconds with any household painting pole or even a broom handle (not included).

Mounting: The brackets are designed and tested to connect to over 95% of gutters. All kits contain WASP fence/fascia brackets, which allow for quick one-time installation on structures without gutters.

Specifications

Warranty: WASP Wildfire Protection Kits come with a 1 year warranty.

Water Pressure: The Nelson R10T 360 degree rotator will discharge approximately 1.5 gallons per minute and will function at a lower water pressure (approx. 20psi) due to a narrower nozzle.

Spray Radius: These units have a 30 foot spray radius.

Hose: Extremely lightweight and compact, this 25 foot hose rolls into a 7" diameter circle for easy storage. Very popular for RV and boat use due to size and weight. Very durable, rated for 300lb pressure.

Weight: A complete base kit weighs approximately 5kg.
